1 x Transmitter (Controller)		1 x 9V 6F22 Battery(for Transmitter)	
1 x Receiver		1 x Adjustable Collar Strap(for Receiver)	2 x 1.5V AAA Batteries(for Receiver)		2 x Pair of Electrodes(for Receiver)	
1 x Test Light(for test shock function)		1 x User Manual	

Qpets Make Happy Owners

Quick Start Guide

Step 1: Prepare the Remote Transmitter

Follow the Positive (+) and Negative (-) signs inside the transmitter. Insert the 1 x 9V 6F22 Battery into the transmitter correctly. Turn on the switch where on the side of the transmitter.

Step 1

Step 2: Pair Transmitter with the Collar Receiver

1. Follow the Positive (+) and Negative (-) signs inside Receiver. Insert the 2 x 1.5V AAA batteries into Receiver. The **RED INDICATION LIGHT** starts blinking and the Green indication light keeps on.

Red LED Light will blink. Green LED Light will stay on

Step 2-1

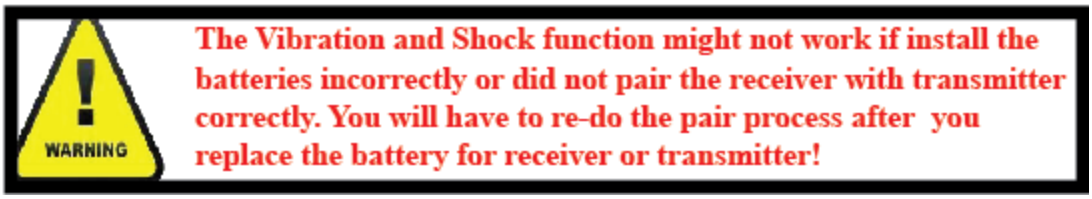
2. Press **Vibration Button** on the transmitter within 20 seconds while the **Red Indication Light** is blinking on the receiver. The receiver will vibrate when successfully paired with transmitter and the **RED Indication light** will stay **ON**. Repeat step 2 if the receiver still does not paired.

Step 2-2

NOTES:

- **Press Vibration Button on the transmitter within 20 seconds while the Red Indication Light is blinking on the receiver. The receiver will vibrate when successfully paired with transmitter and the RED Indication light will stay ON. Repeat step 2 if the receiver still does not paired.**

- **Please always install battery for the Transmitter BEOFE install batteries for the receiver. The Transmitter has to be power on first, then the receiver will be able to receive the pair code from transmitter.**



WARNING
The Vibration and Shock function might not work if install the batteries incorrectly or did not pair the receiver with transmitter correctly. You will have to re-do the pair process after you replace the battery for receiver or transmitter!

Step 3: Install the Electrodes for the Receiver.

Randomly pick one pair of electrodes and screw for receiver. (Please pick the same size electrodes for the receiver.)

Step 4: Adjust the collar to fit your pet.

To ensure a proper fit, please follow the steps below:

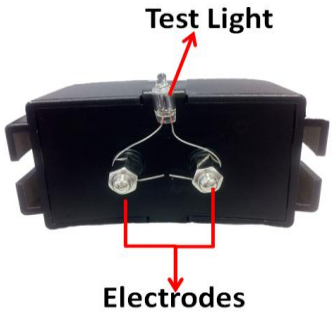
1. Put the strap on the receiver.
2. **With your pet standing, center of the collar receiver where contact points are underneath your pet's neck, touching the skin.**
3. The collar receiver should fit snugly, yet loose enough to allow one finger to fit between the strap and your pet's neck. If the strap is too long for your pet, cut off the excess length.
4. Allow your pet to wear the collar for several minutes and then re-check the fit. Check the fit again as your pet becomes more comfortable wearing the collar receiver.

NOTES:

- **The Transmitter and Receiver will enter Sleep Mode automatically if there is no activity detected within 2 minutes.**
- **To wake up the receiver, please gently shack the receiver and the indication lights of receiver will back on again.**

We would recommend you to use the vibration function first before starting the Shock and always start from the lowest level of shock.

How to Check the Static Shock Function



1. Use the **Test Light** attach on the both side of Electrodes (Metal).
2. Press Shock Button, the **TEST LIGHT** will blink or keeps on.

How to Change the Batteries

- Please replace the Transmitter's battery when the indication light does not light up on the transmitter or transmitter stop working.
- Please replace the receiver's batteries when the **Green Indication Light** does not light up on the receiver or receiver stop working.

Important Tips:
(Please Read)

1. **The valid distance of remote control means the straight-line distance between the transmitter and the receiver without obstacles in between. If there are interference signals or signal screening around, the actual remote control distance may vary.**
2. **The lifetime of the batteries vary according as how often you use the product. Your first battery may not last as long as you expect.**
3. **The whistle function design for you to call your pet, this is not a warning beep function for the receiver.**
4. **This product is for pet training. Good effect can only be achieved after a period of training.**
5. **This product is a wireless transmitting device; you MUST NOT use the remote control system in places like petrol stations or hospitals where mobile phones are prohibited. Patients using heart pacemaker are forbidden to use this product. If some products have the same frequency as this product, the receiver might not work correctly.**
6. **The Electrodes have to directly touch pet's skin as it is very important to effective training.**
7. **This product is only for Pet Training, It is not a <u>Regular Pet Collar</u>. Please remove it from your pet at least 8 hours out of every 24 hours.**
8. **The Device is not waterproof.**
9. **Please turn off power for saving battery life when do not use.**
